

ASSET VALUE MANAGEMENT SERVICES
ASSET RECOVERY & MANAGEMENT SPECIALISTS

AVM collects & receives customer's assets with the same secure consistent, reliable service across all sites.

AVM scans and logs the assets upon arrival at our secure quarantine facility for complete chain of custody.

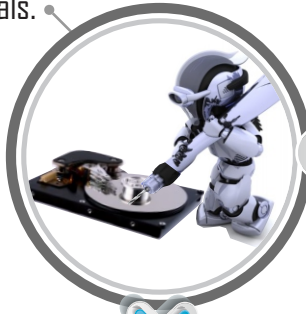

AVM securely logs customer's assets into our secure Private Portal.

Our Data Eradication process securely and completely destroys information according to strict DoD 5220.22-M guidelines from all storage media devices.

Our Processing completely Destroys all storage media assets - dismantle hardware and sort materials.

No

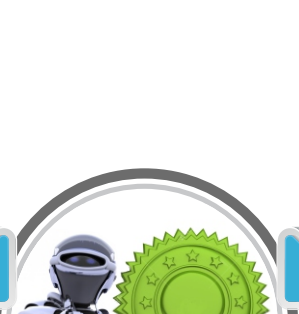

YES

Assets with value are tested, refurbished and remarketed to maximize value recovery.

Assets with Value?

Assets are then recycled following stringent R2 procedures.

Remarketed assets may generate value back to the customer.

Customer receives deliverables

- Including: Audit
- Notarized Bill of Sale (release of liability)
- Certificate of Destruction
- Value (if applicable)
- Destruction Report
